Junior Full-Stack Developer (TypeScript — Node.js — React/Vue — AWS)

REST APIs, authentication flows, database work, and end-to-end application integration.

Summary

TypeScript-based full-stack developer working on UI + API integration in React/Vue, REST endpoints, and database-backed features (MongoDB/PostgreSQL/MySQL). Uses Docker and AWS services (EC2, S3, Lambda) in development and testing workflows. Focused on reproducible builds, documentation, and unit testing.

Skills

- **TypeScript/JavaScript:** TypeScript, ES6, Node.js
- **Frontend:** React, Vue (Composition API)
- **Backend:** Express, REST API design, JWT authentication concepts, API integration
- **Data:** MongoDB, PostgreSQL, MySQL
- **Cloud/Dev:** AWS (EC2, S3, Lambda), Docker
- **Testing/Tools:** Git, GitHub Actions, Jest, Postman

Projects

- **BloodBankManagementSystem** GitHub
 - Full-stack blood bank workflow connecting a TypeScript React UI to backend APIs.
 - API request handling via secure proxying logic to keep client-server interactions controlled.
 - Unit tests and a README for setup and verification.
- **sutra-code** GitHub
 - TypeScript + React application with backend API integration for a mentoring-style experience.
 - Prompt management and API proxying logic for consistent request handling.
 - Tests and project documentation included.
- **HyderabadHustlers-MultilingualMandi** GitHub
 - Multilingual ingestion and search flow with API endpoints for bulk CSV operations.
 - Search indexing improvements and faster query behavior.
 - Dockerized setup and a Postman collection for API testing.

Experience

- **Full Stack Developer Intern** Crystalline Software Technologies, Hyderabad
 - Worked on a risk-management SPA using Vue + TypeScript (migration from legacy JavaScript to TypeScript).
 - Integrated AWS S3 for file storage and worked with IAM role configuration for access control.
 - Implemented REST APIs and worked with MongoDB for document workflows.
- **AI Data Engineering Contributor** Viswam AI / Swecha Foundation (IIIT Hyderabad)
 - Curated and audited Telugu datasets for LLM training pipelines.
 - Implemented preprocessing steps and bias-mitigation checks to improve data quality.

Education

- **B.Tech, Computer Science Engineering** Vidya Jyothi Institute of Technology, Hyderabad

Certifications & Tools

- Cisco Networking Academy: Python, Java, C Programming
- Docker, Postman, GitHub Actions
- Languages: English, Telugu, Hindi
